

ROMATEX

FINDING THE BEST FIT FOR YOUR SLEEP Brought to You by Romatex Bedding and Linen Factory Shop

Duvets and pillows are two key homeware items that determine how well you sleep. They provide not only comfort and warmth but also proper support for a restful and rejuvenating night. Investing in high-quality pillows and duvets is essential to ensure a healthy mind and body.

Romatex is a leading South African manufacturer of high-quality duvets and pillows for homes and hospitality companies. Our homeware products are produced to world-class standards at our mechanised factory in Cape Town. We value quality and customer service, so for the best selection of pillows and duvets, consider Romatex.

WHY DUVETS AND PILLOWS MATTER

These bedding items offer numerous advantages for comfort and a good night's sleep. They provide the necessary comfort and support for your head, neck and entire body while you dream away. A well-made pillow keeps your head and neck aligned, reducing the risk of discomfort or strain.

A good duvet ensures the right amount of warmth and insulation for a comfortable temperature throughout the night. Duvets also play a crucial role in regulating your body temperature. They help keep you warm in colder months and cool during warmer seasons. A duvet with proper insulation and breathability promotes a comfortable and balanced sleep environment.

TYPES OF FILLERS FOR DUVETS AND PILLOWS

At Romatex, we use three types of fillers for our duvets and pillows. These offer varying levels of comfort, support and insulation:

Recycled hollow fibres – Duvets and pillows with recycled hollow fibre fillers are an eco-friendly option. These fibres are often made from recycled plastic bottles and provide good insulation and loft while remaining hypoallergenic and lightweight.

Fibre puff balls – Fibre puff balls offer a soft and fluffy feel, making them ideal for those who prefer a plush and luxurious sleep experience. They are durable, lightweight and hypoallergenic, providing a comfortable and supportive sleep surface.

Microfibre – These fillers are made from synthetic materials that mimic the texture and loft of natural duck-down feathers. They offer excellent insulation, breathability and softness, making them a popular choice for those seeking a hypoallergenic and cruelty-free alternative to down.

OUTER CASING OPTIONS

Outer casings play a crucial role in protecting the fillers and enhancing the overall sleeping experience. Romatex offers three types of outer casings:

100% cotton percale down proof – These casings are breathable, durable and down-proof. They prevent the feathers or fillers from poking through while allowing air to flow for a comfortable sleep temperature.

50/50 polycotton percale – Polycotton percale casings offer a blend of durability and affordability. They are a popular choice for those seeking a balance between comfort, quality and cost-effectiveness.

Microfibre – Once again, these casings are a synthetic alternative to cotton percale. They offer a soft and smooth feel with excellent hypoallergenic properties. Microfibre casings are easy to care for and provide a comfortable sleeping surface.

When it comes to selecting pillows and duvets, quality and manufacturing standards are paramount. Ensure that these bedding items are hypoallergenic and free from harmful substances. Quality

products go through rigorous testing to meet safety standards, providing peace of mind and a healthy sleep environment.

Romatex implements strict quality control measures in the manufacturing processes. Attention to detail, mechanised production and durable construction ensure that our pillows and duvets will withstand years of use. When it comes to finding the perfect bedding for your needs, Romatex is a smart choice.
