

ROMATEX

ALL ABOUT DUVET AND PILLOW FILLERS **Brought to You by Romatex Bedding and Linen Factory Shop**

At Romatex, we use three types of fillers for our duvets and pillows. These offer varying levels of comfort, support and insulation:

Recycled hollow fibres – Duvets and pillows with recycled hollow fibre fillers are an eco-friendly option. These fibres are often made from recycled plastic bottles and provide good insulation and loft while remaining hypoallergenic and lightweight.

Fibre puff balls – Fibre puff balls offer a soft and fluffy feel, making them ideal for those who prefer a plush and luxurious sleep experience. They are durable, lightweight and hypoallergenic, providing a comfortable and supportive sleep surface.

Microfibre – These fillers are made from synthetic materials that mimic the texture and loft of natural duck-down feathers. They offer excellent insulation, breathability and softness, making them a popular choice for those seeking a hypoallergenic and cruelty-free alternative to down.
