## MULTIPLE WELD THERMAL POOL COVERS

### Factory-price GeoBubble pool covers!

A Multiple Weld GeoBubble cover is a top quality GeoBubble cover that performs exactly the same way as a standard cover, and with the same longevity. The only difference is that there are multiple welds / a few joins in it. By joining smaller end of rolls and smaller pieces, we reduce wastage and improve our own sustainability, and in turn we get to pay it forward and give you a cheaper option on a GeoBubble cover.

The Multiple-weld GeoBubble cover is purely a slight compromise but you get the full benefits of the top notch GeoBubble cover for your pool.

Multiple-weld covers are available in all three of our GeoBubble materials – **EnergyGuard, Sol+Guard and Thermal GeoBubble.**

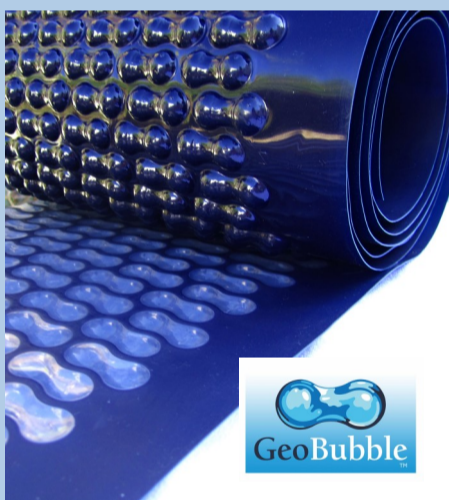

Please note these are not child safety pool covers as they sit directly on the water.

From R40,32/m excl VAT
