SA's water crisis: Pool covers are no longer an accessory, they are a necessity!

Gauteng pool owners are now banned from filling up pools with municipal water and Cape Town's water reserves need to be conserved too as we head into summer.

The good news is that you can still have an operational pool this season, if you cover up!

This month we have excellent factory bargains on our thermal range of pool covers which all curb evaporation by over 98%. To order, send us your exact measurements and we will calculate price according to roll size and available stock. Then collect your pool cover directly from our Cape Town factory or our JHB branch, and simply trim your cover to fit.

This easy and hassle free DIY-fitment allows you to avoid delivery and installation fees. It's the best value for money you will find out there — factory style, factory prices!

So, pack up your hosepipe and drop us a [line](#) now to get covered within 7 working days!

ENERGYGUARD SELECTIVE TRANSMISSION:

Best choice for power saving

SOL+GUARD

Best choice for natural heating
using solar energy only

THERMAL GEOBUBBLE

Best value for money—a good all
round performer

ALL OUR POOL COVERS REDUCE WATER EVAPORATION by 98%+!
